DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-6, drawn to an antifreeze protein which can be derived from plants.

Group II, claim(s) 7-8, drawn to a nucleic acid sequence encoding an antifreeze protein.

Group III, claim(s) 9-10, drawn to a frozen food product comprising an antifreeze protein.

Group IV, claim(s) 11-12, drawn to a method of obtaining an antifreeze protein.

Group V, claim(s) 13, drawn to a plant capable of expressing an antifreeze protein.

The inventions listed as Groups I-V do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The protein of Group I, the nucleic acid of Group II, the frozen food product of Group III and the plant of Group V do not have a common structure, and are therefore not linked by a special technical feature. Furthermore, since an antifreeze protein which can be derived from plants is obvious or anticipated over WO 95/15377 (8 June 1995, Applicant's IDS and Search Report), an antifreeze protein which can be derived from plants does not constitute a special

Art Unit: 1638

technical feature as defined by PCT Rule 13.2, because it does not define a contribution over the prior art. Additionally, the method of obtaining an antifreeze protein is not linked to the protein of Group I and the nucleic acid of Group II by a special technical feature. The protein of Group I can be made by another and materially different method, such as extraction from the native plant.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
